BIST COURSE | Scientific Project Management

IOLANDA MARCHUETA

April 24, 2024 to June 12, 2024
09:00 to 14:00
Recinte la Maternitat, Pavello Garbi

Managing projects with impact, excellence, and efficacy
In this course we will introduce the basic concepts, techniques and procedures of Project Management. We will learn the vocabulary and general guidelines and understand the process in its entirety. The course aims to offer a very broad and general vision of the Project Management framework, and the assimilation of concepts will be achieved combining theory and practice and with Collaborative learning through the preparation of practical cases in groups, always with a hands-on approach.

Dates: 24th, 26thof April; 2nd, 29th of May & 12th of June, 9:00-14:00
Target audience: Post-doctoral researchers and junior group leaders
