

PLUS+ TRAINING PROGRAM: Crash course in deep learning - Advanced module by Prof. Volpe & Prof. Manzo

GIOVANNI VOLPE & CARLO MANZO

November 15, 2024
10:00 to 17:00
Mir-Puig Elements Room

The course will be taught by **Prof. Giovanni Volpe | Full Professor at University of Gothenburg** & **Prof. Carlo Manzo | Associate Professor at the Universitat de Vic.**?

The advanced course is will cover the module **Graph Neural Networks for Relational Data Analysis.**

We'll explore graph neural networks, a family of deep learning models tailored to analyze graph-structured data.

Graph neural networks can grasp relationships within the structures of graphs, making them ideal for uncovering complex patterns within data.?

If you are interested in participating, please **REGISTER** by **November 6.**
