
WORKSHOP: GDS Factory

JOAQUIN MATRES

March 10, 2025

11:00 to 13:00

Elements Room

A fundamental step for photonic integrated circuits fabrication is the design of their layout in a .gds format.

GDSFactory is a powerful tool for photonic layout production, covering from simulation to final layout.

In this seminar, an hands-on introduction to the software will be provided, with focus on:

- Device simulation
- Circuit simulation
- Layout preparation
- DRC
- Data Management

Limited places available.

Register here before March 7th:
