

# YOUNG PHOTONICS CONGRESS 2025 - 10th Anniversary

March 14, 2025

10:00 to 13:30

ICFO Auditorium

---

Are you a high school student who likes science and technology and would you like to meet and share your work with other people?

Come to the next **Young Photonics Congress** and live the experience of a scientific congress where the spotlight is on young people like you. This year we're celebrating our **10th edition of YPC!**

ICFO is giving you a great opportunity: join the next Young Photonics Congress and live the experience of a **scientific congress where the spotlight is on young people like you!** You could explain your research project to other students and also to ICFO researchers. It is an amazing opportunity to share knowledge and experiences with other people

## **PROGRAM:**

**10:00 - 10:50: Introduction and Flash Talks**

We will open the conference with a brief introduction to photonics and ICFO, followed by ICFO research projects explained in the first person by those who work there.

**10:50 - 11:30: Monologues about photonics**

This section will be facilitated by Big Van Ciencia.

**11:30 - 11:40: Group photo**

**11:40 - 13:00: Project presentations**

This section will have the structure of a typical poster session at a scientific conference. All projects will be presented at the same time: attendees will be able to discover the different projects and ask questions to the authors in small conversation groups.

**13:00 - 13:15: Closing**
