ICFO

INTERACTIVE DISCUSSION: COLLABORATIVE SCIENCE

December 09, 2025
15:00 to 16:00
Auditorium

Chair: ICREA Prof Dr. Darrick Chan
Panellists:

Dr. Denitza Denkova, postdoctoral researcher in the SLN team
Prof. Dr. Pelayo Garcia de Arquer, leader of the CO2 Mitigation Accelerated by Photons group
Prof. Dr. Nicoletta Liguori, Leader of the Photon Harvesting in Plants and Biomolecules group
Dr. Clara Vilches, Staff Researcher in the Medical Optics group

At an abstract level, the vast majority of researchers believe in the value of scientific collaboration. At the same time, it is rarely discussed exactly what are the benefits that we

can reap, how to effectively engage with others outside your field, how to approach collaborations from a professional standpoint, and how to overcome potential barriers (personal, institutional, structural) to fruitful collaboration. During this interactive session, we aim to explore these themes in more detail.?

There will be a coffee break in the NEST HALL immediately following this discussion for al participants to keep the conversation going.
