

360CARLA Careers Symposium on Energy, Environment, and Sustainability

June 29, 2026

14:00 to 19:00

ICFO Auditorium

ICFO is excited to announce the first edition of the **360 CARLA Symposium on Energy, Environment, and Sustainability**, taking place on **29 June 2026** at ICFO.

When: 29 June 2026, starting at 14:00 CET

Where: ICFO (Castelldefels, Barcelona)

Deadline: Register before 7th June. Participation is free of charge, but spots are limited.

This symposium is designed for STEM undergraduates and graduate students, early career

researchers, and professionals interested in exploring innovative photonics career paths at the intersection of energy, environment, and sustainability.

Join this event for:

Overview of the energy and environmental field in photonics.

Interactive panel sessions: Engage with leading professionals from both academia and industry to discuss career opportunities and pathways in sustainable energy and environmental technologies.

Hot topics lectures: Gain insights from renowned speakers on critical subjects related to energy and sustainability.

Networking opportunities: Meet and collaborate with peers, industry leaders, and academics.

If you are interested in connecting with other STEM students and professionals in academia and industry within the energy and sustainability field, please register now to join this growing community.

This event is organised by ICFO as part of the **360 CARLA project**, focusing on the vertical of **Energy, Environment, and Sustainability** within the framework of the [ICFO Frontiers Research Schools](#).

The program will be available soon.

This project has received funding from the European Union Horizon Europe research and innovation program under grant agreement No 101135838
