

ICFO welcomes outstanding Summer Fellows

Ten new students join this summer ICFO's Undergraduate Summer Research Program.

July 04, 2007

ICFO launches this year the new Undergraduate Summer Research Fellowship Program. ICFO summer fellowships provide a unique opportunity for undergraduate students and their ICFO group leader mentors to engage in approximately twelve weeks of full-time research.

The students awarded with the fellowships this year are: Marta Abad, Albert Benseny, Quentin Glorieux, Freya Gnam, Blanca Carlota Gonzalez, Ana Maria Lozano, Josep Mas, Joanna Olesiak, Anabel Rodriguez , and Agnes Sauleda.

The Summer Research Fellowship Program aims at early exposure to science and research, and early support of outstanding undergraduates.

The program facilitates a diversity of research projects that allow students at primarily undergraduate institutions from all over the world to experience first-hand the excitement and challenges of careers in ICFO research fields.
