

Research Leaders

Antonio Acin's research featured in the news of the department of Economy and Knowledge of the regional government.

May 02, 2011

ICREA Prof. Antonio Acin leads the quantum information theory group at ICFO. In 2007 he was awarded an ERC starting grant for his project PERCENT (Percolating Entanglement and Quantum Information Resources through Quantum Networks).

Because the ERC grants projects for researchers with a pioneering frontier research plan, the magazine RECERCAT of the department of Economy and Knowledge of the regional government publishes an interview with Prof. Acin exposing the basis and applications of his project. The interview is part of a RECERCAT series on research leaders in Catalonia.
