

New OSA Fellow

Romain Quidant elected OSA Fellow

September 21, 2017

The Board of Directors of The Optical Society (OSA) has elected ICREA Prof at ICFO Romain Quidant a Fellow of the Society. This honor is in recognition for "pioneering plasmon enabled light-matter interaction at the nanometer scale including laser tweezers, biosensors, thermoplasmonics and control of quantum emitter emission."

OSA Fellows are a distinguished group of members who have served with distinction in the advancement of optics and photonic, and, as limited by the Society's bylaws, may account for no more than 10% of the total OSA Membership.

Congratulations Romain!

Prof Romain Quidant
