ICFO

ICFO- San Joan de Deu Joint Lab

Annual meeting brings together researchers and clinicians to advance projects of the Joint Lab

June 22, 2022

Researchers and clinicians of Sant Joan de Deu (SJD) Institut de Recerca and ICFO recentl met at SJD for the Annual Meeting of the ICFO-SJD Joint Lab. The meeting was an opportunit to discuss the the main advances of the different ongoing collaborative research project and to update the status of their activity plans. The productive meeting made it possible t share insights on this ongoing collaborative framework, and to look for further synergies an new upcoming project opportunities. After the session all the participants had th opportunity to visit the newly SJD Paediatric Cancer Centre (PCCB).

The ICFO-SJD Joint Lab is a joint project initiated in 2020 between Institut de Recerca Sant Joan de Deu and ICFO to promote interdisciplinary research activities to boost the development and application of photonic technologies as innovative solutions for the care of the neonatal and pediatric population.
