

## **Radiantis at Laser World of Photonics in Munich**

ICFO spin-off exhibits at world's largest gathering for optical technologies

June 23, 2015

---

Radiantis, an ICFO spin-off co-founded by ICREA Professor at ICFO Majid Ebrahim-Zadeh and ICFO alumnus Dr. Sara Otero (CEO), specializing in ultrafast Optical Parametric Oscillators and Harmonic Generations for scientific applications, is exhibiting at the world's largest industry gathering for optical technologies, LASER World of PHOTONICS, collocated with the CLEO/ Europe- EQEC 2015 conference in Munich from June 22 - 25, 2015.

LASER World of PHOTONICS was the world's very first trade fair for the optical technologies sector being held at the Messe München International every two years since 1973.

The fair is the most important marketplace and constructive think tank for the global laser

and photonics industry. It features more than 1,000 exhibitions from more than 30 countries and gives visitors a complete overview of all the latest trends and applications.

The 2015 fair revolves around the focus topics of Lasers and Laser Systems from Production Engineering, Bio photonics and Medical Technology, and Illuminations and Energy.
